

**The Korea Bio-Beauty
Industry Cooperative**

KBIC

Company

It was established to create cosmetics that reflect consumer needs, communicate with consumers, and solve skin problems together through various clinical data analysis, focusing on the globalization of K-beauty, marketing, and education through its own development.

In order to make it easier and safer for consumers to use, we have made products with carefully selected and proven ingredients through numerous clinical and research developments over the years, hoping that their skin will be healthier today than yesterday. We want to grow into an honest cosmetics brand that always thinks and solves with customers.

Winning the Chairman's Award

Recipe S Ampoule (With MTS)

It is a beauty device that combines sterilized disposable MTS needle (0.25mm) rollers. Micro-needle rollers create fine holes that deliver the active ingredients of the ampoule directly deep into the epidermis layer, increasing absorption than when applied by hand, resulting in an immediate effect.

- It is a system that prevents scratches from rotating on curved skin by rotating the needle individually.
- The needle roller head is rotated 360 degrees.
- The top of the needle rotates at 90°C, making it convenient to use on the curved surface of the face.
- Individual sterile vacuum treatments were used.
- The needle is combined with 7 disks and 8 holders.
- It is a pumping type that allows the ampoule and needle to be combined and discharged as much as you want.
- Contains whitening wrinkle double functional ingredients.

Recipe S Ampoule

The active ingredient of rare wild ginseng extract, which is condensed with skin life energy, invigorates the lost skin and strengthens it healthily from the base of the skin, creating a solid skin barrier. It delivers moisture and nutrition rich in Sodium hyaluronate (hyaluronic acid) to dry and dry skin, so you can feel glossy and moist skin all day long without pulling.

- Contains whitening wrinkle double functional ingredients.
- If you apply ampoule, it absorbs quickly into the skin.
- It's not sticky and it helps with dryness.

Primo Foam Cleanser

It is a hypoallergenic, mildly acidic foam cleanser with the healthiest index pH of the skin. It is an all-in-one product that can be used in all areas from head to toe, and it contains natural ingredients and is a mild cleanser with an EWG green rating.

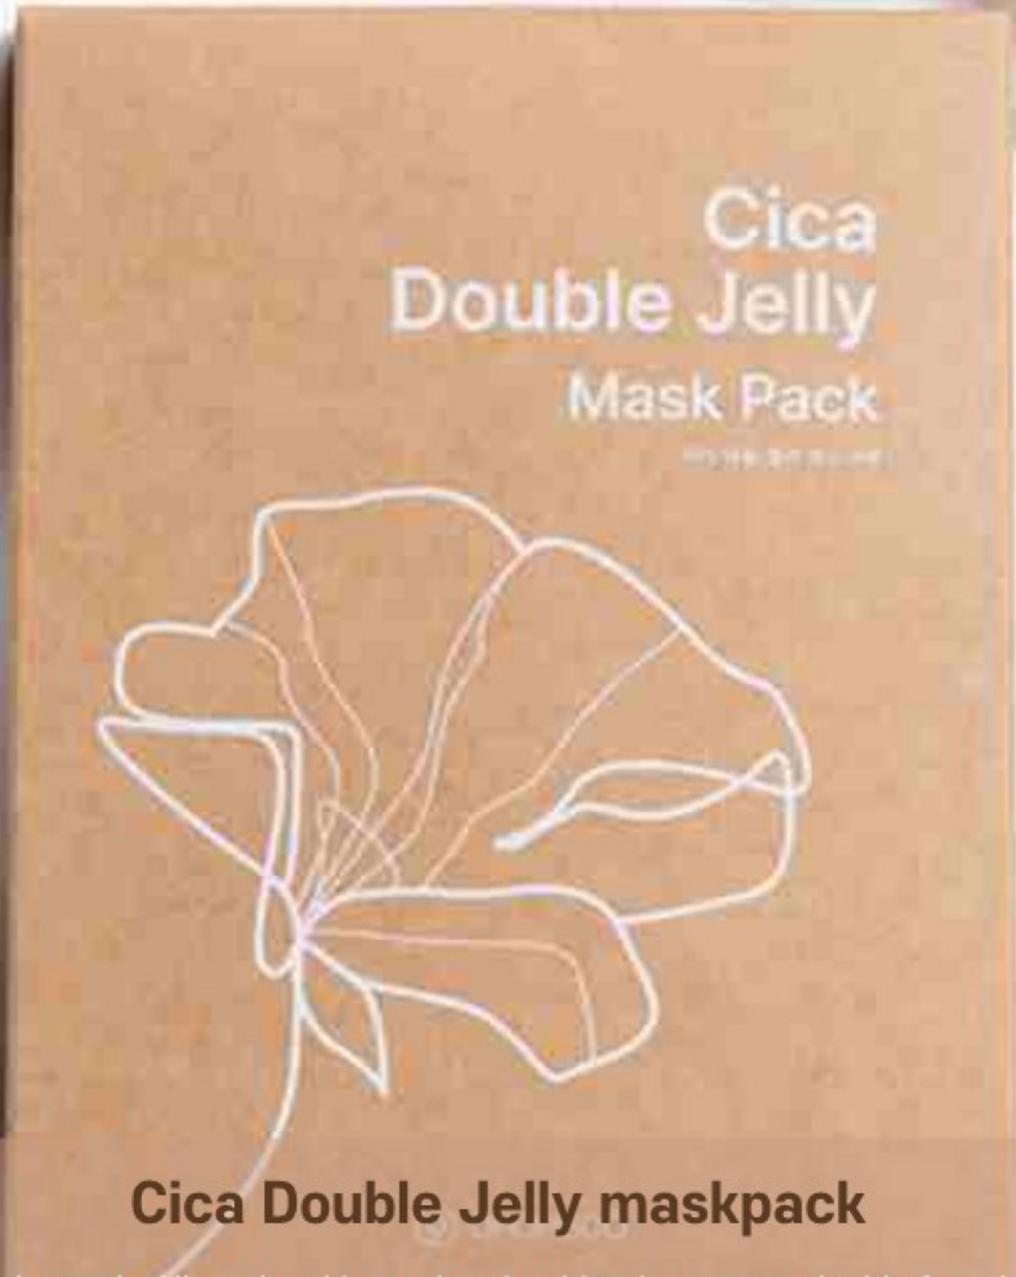

- Rich bubbles cleanse sebum and waste, so you don't need to wash your face twice.
- It is a proven natural ingredient that is less irritating to the skin or eyes.
- All ingredient EWG green grade, mild enough for everyone to use.
- After washing your face, it stays moist for a long time, so it stays moist even in dry winter.

Glacia Whiening / Lifting Ampoule (With MTS)

It is a beauty device that combines sterilized disposable MTS needle (0.25mm) rollers. Micro-needle rollers create fine holes that deliver the active ingredients of the ampoule directly deep into the epidermis layer, increasing absorption than when applied by hand, resulting in an immediate effect.

- It is a system that prevents scratches from rotating on curved skin by rotating the needle individually.
- The needle roller head is rotated 360 degrees.
- The top of the needle rotates at 90°C, making it convenient to use on the curved surface of the face.
- Individual sterile vacuum treatments were used.
- The needle is combined with 7 disks and 8 holders.
- It is a pumping type that allows the ampoule and needle to be combined and discharged as much as you want.
- It contains whitening (blue) and wrinkled (pink) ingredients, respectively.

Cica
Double Jelly
Mask Pack

Cica Double Jelly maskpack

Double cross-hole mask. Allow the skin to absorb whitening crease double functional ampoule. The jelly-type sheet adheres perfectly to the skin along the curved surface of the face and immediately lowers the skin's temperature and calms the skin with a sheet suitable for heat release from the aging skin.

- It is a proven product that has completed both hypoallergenic tests and 8 types of harmful ingredients.
- Contains whitening wrinkle double functional ingredients.
- We made the package with eco-friendly certified recycled paper.
- We are practicing ESG that returns part of the sales amount to society.

Realizing social values through community contribution and ESG management practice

Delivery packaging system using eco-friendly materials
